During this long journey in Enterprise Solution segment, Team TSL, felt the need of ultra low cost solution to Small & Mid Manufacturing Units who are desperately looking at a generic Production Management Software (an Alternate ERP). These SMEs are already using some accounting software which delivers them everything except a Production Management System to check their production losses, their inventories, their Material Requirement planning, yield, management of Bills of Materials (BOM) etc.

An idea was conceived by Team TSL. With the helps of mentors from the field, an idea was incubated and prototype was developed. After testing by actual users across the segment, first version was released during 2013 and its second version was brought in November 2014. It carries now features which match with 95% requirement of any manufacturing unit either in Batch Processing or Continuous Process or discrete production system. Out of all these hard efforts India's first Branded CD based Production & Inventory Management Software (an Alternate ERP) was born.

Modules @ TICK

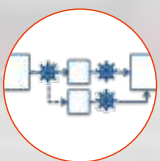

Production Management

Inventory Control

Material Planning

Vendor Order Process

Jobwork Management

Customer Management

Features @ TICK

Production Planning & Control

- Material Requirement Planning
- Multi-Level Bill of Material (BOM)
- Job Route Card (Made to Stock / Made to Order)
- Daily Production Entry
- Manage Scrap and Loss
- Demand Material Slip
- RM Consumption Voucher
- Finish Material Received by Store Department
- Maintain WIP Stock
- Costing Sheet Generation

Purchase Order to Material Receipt

- Generate Indent (Requisition Note)
- Create Purchase Order
- Item wise approved vendor
- Short Close-Purchase Order
- Multi Level Scheduling
- Purchase Order Status (Pending / Completed)
- Material Receipt Note

Inventory Management

- Comprehensive Recording of Stock Movement
- Multi Locations Stock Control (Batch-wise)
- Multiple Stock Valuation Methods
- Stock Transfer to Locations
- Re-Order Levels
- Material Conversion
- Physical Stock Adjustment
- Stock Position

Sales Order to Dispatch

- Lead Generation with follow-ups
- Customers Sales Order
- Dispatch Note
- Stock Reservation (At the time of SOP)
- Managing of Order and Tracking
- Sales Order Status (Pending / Completed)

Job Work Management

- Create Job Order
- Incoming Material Received
- Link with Production Floor
- Dispatch Material through 57 F4 RGP
- Receive Material from Job Work Through RGP
- Generate Reports-Annexure VI & V
- Job Order Status (Pending / Completed)
- Job Order Status (Pending / Completed) Stock Valuation Methods

Add-Ons @ TICK

Quality Control

- Define QC parameters
- Incoming material QC
- Shop floor QC
- Generate Certificate of Analysis

Quotation Management System

- Generate Sales Quotation
- Enter Purchase Quotation
- Quotation Compassion

Tally Integration

- Export MRN to Receipt Note
- Export Dispatch note to Delivery note

GST Invoice

- GST Invoices
- HSN Code Mapping into Item Master
- Setup Customer / Supplier GSTIN Number
- Generate GSTR-1 Return : CSV Format
