

#1 Production ERP With Tally Integration

Elevate Performance, Control Costs, Improve Operations

**Production
Management**

**Inventory
Control**

**Material Req.
Planning**

**Vendor Order
Process**

**Jobwork
Management**

How **TICK** Will Help You?

TICK Production ERP integrates seamlessly with Accounting software to help you run your business. TICK Production ERP Software is simple to install, quick to implement and easy to use. You will be able to:

- **Analyze production costs more accurately**
- **Integrate manufacturing with accounting**
- **Improve production efficiency**
- **Eliminate purchasing losses**
- **Reduce inventory costs**

INDUSTRIAL VERTICAL »

➤ **Batch Processing**

Chemical, Dairy, Pharma, Food and Beverage, Medical Device, Cement, Paint & Cosmetic

➤ **Discrete Processing**

Auto Component, Industrial Machinery, Steel Industries, Electronics, Plastic Industries, Metal Fabrication, Packaging Industry

Customer Management

Quality Control

Accounts Integration

Approval System

Quotation Management

Barcoding Modules

➡ Production Planning & Control

Definition of Multi level Bill of Material, Create Job Route Card, track work-in-process (WIP), maintain work center information and analyze shortages and backlogs, Subcontract Processing, Labor Tracking, Daily Production Entry, Manage Scrap and Loss, Demand Material Slip, RM Consumption Voucher, Finish Material Received by Store Department & Costing Sheet Generation

➡ Vendor Order Process

Manages Vendor Statistics like Vendor Master file, Vendor item's price, discounts available, etc, Define of Best Vendor item wise, Generate Indent, Purchase Quotation, Provision for Quotation Comparison, Purchase Order, Multiple delivery schedules, Quality inspection of goods, Approval System, Gate Pass Entry, Purchase Bill, Purchase Return, Order cancellation and order closing & Purchase Order status

➡ Customer Management

Lead Generation with follow-ups, Sales Quotation, order entry, modification, tracking, and inquiry Multiple jobs on one contract, Multiple releases on one job, automatic assignment of job numbers, Sales Invoice, Approval System, Sales Return & Sales Order short close, Multi Order Scheduling, Products/ Customer wise analysis & MIS ANalysis of Sales Orders, Pending Orders with status of deliveries
